

Odoo 19 Implementation Task Plan

Ready-Made Doors, Frames, Hardware and Accessories Trading - Iraq

Three locations | 17+ core users | Sales, POS, Inventory, Purchase, Quality and Finance

Version 1.0 | 11 July 2026 | Planning baseline for discovery and implementation

Prepared from standard_tasks.xlsx, the local Odoo 19 Community/Enterprise source, and a read-only review of the supplied Odoo.sh furniture reference database using the codex_odoo_sh identity. Custom code in that reference was deliberately not treated as a requirements baseline.

1. Executive summary

The target solution is a trading and distribution system, not a manufacturing or field-installation system. Odoo will control imported and locally purchased ready-made doors and components, inventory across three physical sites, light in-house customization sold as services, showroom POS, wholesale/contractor credit sales, delivery, driver cash, landed cost, quality release, and segregated accounting.

The recommended approach is Odoo 19 Enterprise with standard applications as the accounting and operational backbone, plus a small, controlled set of custom addons for requirements that must block, aggregate or orchestrate transactions across applications. Studio alone should not be used for accounting-critical security or blocking logic.

The furniture reference supports this direction: standard Sales, Purchase, Inventory, POS, Accounting, Quality, Approvals, Expenses, Documents, Dashboards and Landed Costs are installed; it also demonstrates multiple POS configurations, multiple cash/driver-style journals, Arabic labels and separate Color, Size and Height attributes. It has only one warehouse, so its topology must not be copied; this design requires three warehouses and transit controls.

2. Business and solution boundaries

- Included: import/local purchasing, warehousing, internal transfers, sales, POS, delivery handover, returns, light customization charges, quality, accounting, landed cost, expenses, driver cash, approvals and dashboards.
- Excluded: raw-material manufacturing, bills of materials, work orders, MRP costing, construction-site installation, field-service dispatch and engineering crews.
- Light customization is handled as service lines and controlled workshop/quality statuses. Detailed capacity or work-center planning is future scope.
- Iraqi tax and withholding configuration requires written validation by the client chief accountant/tax adviser.

3. Standard-versus-extension decision

Requirement	Recommended treatment	Reason
Variants, RAL/size attributes, quantities, incoming and forecast	Standard foundation + custom search/panel	Core data is standard; separated filters and consolidated branch presentation need tailored UI.
Quantity discounts	Standard pricelists	Minimum-quantity rules cover the agreed tiers.
Discount and credit approvals	Custom chained approval	Freeze transaction and require AR then one Owner with audit evidence.
Quality checks	Enterprise Quality + custom	Checks are standard; absolute delivery/POS

Requirement	Recommended treatment	Reason
	release block	enforcement requires extension.
Landed costs and FX	Standard	Configure and reconcile standard accounting/inventory capabilities.
Fast transfer manifest	Barcode + custom manifest action	Keep standard transfers as truth; remove line-by-line receipt entry.
Customer 360 and branch stock	Custom read-only panels	Information spans accounting, sales, POS and inventory.
Driver cash boxes	Cash journals + custom COD/handover	Journals hold balances; delivery assignment, counted handover and variance need workflow.
Expense matching	Standard reconciliation models	Recurring descriptions can propose accounts and analytics.
Light customization	Service products + small workflow	Avoid MRP while guaranteeing price capture and quality status.

4. Delivery gates and acceptance

- Gate 0: scope and governance approved.
- Gate 1: discovery and fit-gap blueprint signed.
- Gate 2: foundation, security and master-data design accepted.
- Gate 3: configured prototype and custom specifications approved.
- Gate 4: testing and migration rehearsal pass.
- Gate 5: training and UAT signed.
- Gate 6: go-live readiness and opening reconciliations approved.
- Gate 7: hypercare closed and handover accepted.

Acceptance requires configured evidence, tests, reconciliations, negative-access checks where relevant, issue closure and named client approval.

5. Detailed implementation task register

Each item is a deliverable-bearing task. “Extension” includes Studio only where safe; accounting-critical, blocking, security and cross-application logic requires a version-controlled addon.

P0 - Mobilization and governance

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
001	Confirm commercial scope, objectives, success measures, exclusions and change-control procedure	Project Manager	Standard	Signed scope baseline and KPI list
002	Appoint sponsor, steering committee, process owners, key users, data owners and backups	Project Manager	Standard	Approved responsibility matrix
003	Create project workspace, decision log, issue/risk log, change register and weekly cadence	Project Manager	Standard	Project controls operational

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
004	Confirm Odoo.sh production, staging and development branches, access and backup policy	Technical Lead	Standard	Environment readiness record
005	Document reusable configuration patterns from the furniture reference database and validate which apply to the doors business	Functional Lead	Reference reviewed	Reference review report
006	Confirm Arabic/English language, Asia/Baghdad timezone, IQD base currency and USD transaction currency	Chief Accountant	Standard	Localization decision sheet
007	Run kickoff and approve detailed discovery calendar for all 17+ core users	Project Manager	Standard	Kickoff minutes and workshop plan

P1 - Discovery and solution blueprint

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
010	Map lead/quotation/POS/order/delivery/return processes for retail, wholesale and contractors	Sales Lead	Standard	Signed sales process map
011	Map foreign and local purchasing, container tracking, receipt and three-way-match controls	AP Accountant	Standard	Signed procure-to-pay map
012	Map three-site stock topology, receipts, internal transfers, reservations, dispatch and counts	Inventory Lead	Standard	Signed warehouse map
013	Define door customization intake, pricing, workshop status and handover without MRP or field service	Operations Lead	Extension	Approved light-customization blueprint
014	Define quality criteria by product family and the exact mandatory release gate	Inventory Lead	Extension	Quality control matrix
015	Define AR, AP, driver cash, bank, expenses, landed cost, FX, tax and closing processes	Chief Accountant	Standard + extension	Finance blueprint
016	Define branch profitability dimensions, analytic accounts/plans and executive reporting KPIs	Chief Accountant	Standard	Management reporting blueprint
017	Define discount tiers, exception thresholds, credit limits and two-stage approval authority	Owners + AR Accountant	Extension	Approval authority matrix
018	Profile all legacy data sources, volumes, quality, duplicates and historical retention needs	Data Lead	Standard	Data assessment report
019	Approve fit-gap register classifying every requirement as standard, configuration, Studio, custom or excluded	Steering Committee	Standard	Signed solution blueprint

P2 - Platform, company and security foundation

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
020	Install and validate Sales, Purchase, Inventory, Barcode, POS, Accounting, Contacts, Quality,	Technical Lead	Standard	Installed-app baseline

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
	Approvals, Expenses, Documents and Dashboards		Enterprise	
021	Keep MRP, Project-based field installation and Field Service outside operational scope	Functional Lead	Explicit exclusion	No unintended manufacturing/service flow
022	Configure legal company profile, addresses, logo, document layout, languages and currencies	Functional Lead	Standard	Approved company setup
023	Create 3 warehouses: Main Warehouse, Branch 1 and Branch 2 with internal/transit locations	Inventory Consultant	Standard	Warehouse topology tested
024	Configure sequences by warehouse/branch for quotations, POS, receipts, deliveries, transfers and journals	Functional Lead	Standard	Traceable numbering scheme
025	Create 17+ named users and assign least-privilege application access	Administrator	Standard	User register
026	Implement segregated accounting roles for AR, AP, driver treasury, inventory cost, tax/expenses, bank reconciliation and chief accountant	Technical Lead	Custom security	Negative-access tests pass
027	Restrict each warehouse specialist to intended operational locations while preserving approved cross-branch visibility	Technical Lead	Custom security	Warehouse access tests pass
028	Configure owners as read-only executive users with approval rights and dashboards	Administrator	Configuration + extension	Executive access accepted
029	Enable audit-friendly chatter, activities, document attachments and approval evidence retention	Functional Lead	Standard	Audit trail convention
030	Execute security test matrix: allowed actions, prohibited actions and escalation paths for every role	QA Lead	Standard	Signed segregation-of-duties test

P3 - Master data and product architecture

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
031	Design product category hierarchy for doors, frames, panels, locks, accessories, glass and services	Product Data Owner	Standard	Approved category tree
032	Define stockable products versus non-stock service products and accounting properties	Inventory Accountant	Standard	Product-type matrix
033	Create independent attributes for color/finish, RAL code, width, height, frame size, handing and model	Product Data Owner	Standard	Attribute dictionary
034	Decide variant-generation rules to avoid unnecessary SKU explosion and archive invalid combinations	Product Data Owner	Standard	Variant policy
035	Define SKU, barcode and display-name conventions supporting Arabic/English search	Product Data Owner	Standard	Naming convention
036	Add normalized searchable RAL/color and dimension fields	Technical Lead	Custom	Independent search

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
	and filters to product, sales and POS selection		UI/search	accepted
037	Configure units of measure, packaging, supplier codes, lead times, minimum quantities and purchase prices	Purchase Lead	Standard	Supplier data ready
038	Configure AVCO or FIFO decision by category, automated valuation, stock/input/output and price-difference accounts	Inventory Accountant	Standard	Valuation setup approved
039	Create customization service catalog: trimming, lock drilling, glass insertion and RAL spraying with IQD prices	Sales Lead	Standard	Service catalog
040	Configure optional accessory/customization prompts when a door is added to quotation or POS	Technical Lead	Custom UX	Add-on prompt test passes
041	Prepare controlled import templates for products, variants, barcodes, suppliers, contacts and price lists	Data Lead	Standard	Approved templates
042	Cleanse, deduplicate, trial-import and reconcile master data counts	Data Lead	Standard	Migration rehearsal report

P4 - Sales, POS, pricing and customer controls

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
043	Configure sales teams by branch, quotation templates, validity, payment terms and delivery policy	Sales Consultant	Standard	Sales setup tested
044	Configure two POS terminals, cash/card/customer-account methods, receipts, taxes and session controls	POS Consultant	Standard	Branch POS pilots pass
045	Configure quantity-based pricelist breaks: 1-4 standard, 5-9 5%, 10-19 10%, 20+ 15%	Sales Consultant	Standard	Price tests pass at boundaries
046	Prevent unauthorized manual discounts and log requested versus permitted discount	Technical Lead	Extension	Discount control test passes
047	Build sequential exception approval: AR Accountant then one Owner for excess discount or credit exposure	Technical Lead	Custom workflow	Approval, rejection and timeout tests pass
048	Configure customer credit limits, payment terms, overdue policy and warning/block thresholds	AR Accountant	Standard + extension	Credit-control matrix accepted
049	Build customer 360 action from Sales and POS showing invoices, debt, limits, purchases and exact variants	Technical Lead	Custom UI	Customer history acceptance test
050	Build cross-branch availability panel showing on hand, reserved, available, incoming and sold by warehouse	Technical Lead	Custom UI/report	Three-warehouse quantities reconcile
051	Configure reservations, partial fulfillment,	Sales + Inventory	Standard	Allocation scenarios pass

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
	backorders, branch sourcing and customer promises	Leads		
052	Configure quotation/order cancellation, returns, refunds, exchanges and damaged-goods handling	Functional Lead	Standard	Exception scenarios pass
053	Configure delivery orders with driver assignment and cash-on-delivery payment expectation	Functional Lead	Extension	COD traceability test
054	Validate retail, wholesale, contractor, mixed payment, credit, return and customization end-to-end scenarios	QA Lead	Standard	Sales/POS test pack signed

P5 - Purchase, imports and landed cost

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
055	Configure local/foreign vendors, USD/IQD price lists, incoterms, lead times and purchase agreements	Purchase Consultant	Standard	Vendor purchasing setup
056	Configure RFQ/PO approval limits including high-value owner approval	Technical Lead	Approvals/ configuration	Purchase approval tests pass
057	Configure purchase receipt and vendor bill control policy for three-way matching	AP Accountant	Standard	PO/receipt/bill tolerance tests
058	Model container/import reference, ETD, ETA, carrier, customs status and document attachments	Technical Lead	Studio or custom	Shipment tracker accepted
059	Configure incoming quantities and expected dates from confirmed purchase orders	Purchase Consultant	Standard	Incoming stock visibility validated
060	Configure landed-cost service products for freight, customs, clearance and offloading	Inventory Accountant	Standard	Landed-cost catalog
061	Define and test landed-cost allocation methods and accounting postings by receipt/container	Inventory Accountant	Standard	Cost allocation reconciliation
062	Configure foreign-currency bills, exchange rates, realized/unrealized differences and payment scheduling	Chief Accountant	Standard	FX accounting tests pass
063	Test partial receipt, damaged receipt, short shipment, extra charges, return-to-vendor and bill variance	QA Lead	Standard	Procure-to-pay UAT signed

P6 - Inventory, transfers, barcode and quality

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
064	Configure receipts, deliveries, internal transfers, transit locations and branch replenishment routes	Inventory Consultant	Standard	Operation types validated
065	Configure barcode nomenclature, product labels, package/transfer sheet barcodes and scanners	Barcode Consultant	Standard + extension	Barcode pilot passes

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
066	Create digital transfer manifest with batch lines and a single scan/open action	Technical Lead	Custom	Manifest generated and traceable
067	Implement one-click/batch validation at receiving branch with discrepancy capture, not blind acceptance	Technical Lead	Custom	Rapid transfer acceptance test
068	Validate real-time origin, transit and destination balances during every transfer state	QA Lead	Standard	Transfer quantity reconciliation
069	Configure putaway/storage conventions, damaged/quarantine locations and scrap policy	Inventory Lead	Standard	Location controls accepted
070	Configure quality control points for receipt, pre-delivery and POS handover by product family	Quality Consultant	Standard Enterprise	Quality points active
071	Configure checks for dimensions, paint integrity, warping, accessories, glass and lock preparation	Quality Consultant	Standard	Check templates approved
072	Implement hard block preventing delivery/POS handover while quality is pending or failed	Technical Lead	Custom blocking rule	Negative release tests pass
073	Configure quality alerts, quarantine, rework/customization return, downgrade and manager disposition	Quality Consultant	Standard + extension	Failed-quality workflow passes
074	Configure cycle counts, annual inventory, count tolerances and approval of adjustments	Inventory Accountant	Standard	Count procedure and tests
075	Configure reordering rules using on-hand, forecast and incoming demand without double ordering	Inventory Planner	Standard	Replenishment scenarios pass
076	Reconcile inventory valuation, stock cards and branch quantities after all inventory scenarios	Inventory Accountant	Standard	Inventory control signoff

P7 - Finance, treasury, tax and expenses

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
077	Design and import Iraqi chart of accounts with account groups and control accounts	Chief Accountant	Localization/configuration	COA approved
078	Configure sales, purchase, cash, bank, card, driver and miscellaneous journals with sequences	Chief Accountant	Standard	Journal matrix
079	Configure IQD rounding, USD transactions, exchange-rate policy and multi-currency reporting	Chief Accountant	Standard	Currency tests pass
080	Configure sales and purchase tax treatment and validate Iraqi statutory requirements with client tax adviser	Tax Accountant	Configuration	Tax signoff; legal advice retained by client
081	Configure 3.3% supply and 7% service withholding logic, certificates and reporting	Technical Lead + Tax Accountant	Localization/custom	Withholding scenarios pass

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
	where applicable			
082	Configure AR invoicing, receipts, aging, follow-up, credit notes and branch cash verification	AR Accountant	Standard	AR month simulation
083	Configure AP bills, payment schedules, vendor statements, refunds and three-way-match review	AP Accountant	Standard	AP month simulation
084	Create a dedicated virtual cash journal/box for each delivery driver	Treasury Accountant	Standard design	Driver journals operational
085	Implement driver collection posting from delivered COD order to assigned driver box	Technical Lead	Custom workflow	Collection traceability test
086	Implement daily driver statement, counted cash, central-vault transfer and over/short variance approval	Technical Lead	Custom workflow/report	Daily handover signoff test
087	Configure branch petty cash, employee advances, settlements, fuel and vehicle expenses	Expense Accountant	Standard	Expense workflows pass
088	Configure reconciliation models for recurring fuel, porter, hospitality and branch cost-center coding	Bank Reconciliation Analyst	Standard	Auto-matching sample accuracy accepted
089	Configure bank/card statement import format, reconciliation, outstanding accounts and terminal clearing	Bank Reconciliation Analyst	Standard	Bank and card reconciliation test
090	Configure analytic plans/accounts for Main, Branch 1, Branch 2, delivery and workshop customization	Chief Accountant	Standard	Analytic allocation tests
091	Configure fiscal periods, lock dates, accruals, inventory close, FX revaluation and month-end checklist	Chief Accountant	Standard	Mock close completed
092	Validate trial balance, P&L, balance sheet, cash flow, partner ledger, aging, tax and inventory valuation	Chief Accountant	Standard	Financial report signoff

P8 - Reporting and management control

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
093	Create executive dashboard for consolidated sales, gross margin, cash, receivables, payables and inventory	BI Consultant	Standard dashboard	Owner dashboard accepted
094	Create branch profitability view using revenue, COGS, discounts, expenses and analytic allocations	BI Consultant	Standard + report extension	Branch P&L reconciles to GL
095	Create inventory control dashboard for on hand, reserved, available, incoming, aging, slow stock and	BI Consultant	Standard dashboard	Inventory dashboard accepted

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
	reorder risk			
096	Create shipment/container tracker for PO value, ETA, received status and landed-cost completion	BI Consultant	Custom report	Shipment tracker accepted
097	Create discount and credit-exception dashboard with approval turnaround and overrides	BI Consultant	Custom report	Control dashboard accepted
098	Create driver cash dashboard for open collections, handovers, variances and overdue cash	BI Consultant	Custom report	Treasury dashboard accepted
099	Configure saved filters and scheduled reports for each executive/accounting/warehouse role	Functional Lead	Standard	Role reporting pack

P9 - Data migration and cutover

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
100	Approve migration scope, cut-off dates, ownership, reconciliation rules and rollback criteria	Data Lead	Standard	Migration strategy
101	Clean and import customers, suppliers, contacts, credit terms and credit limits	Data Lead	Standard	Contact reconciliation
102	Clean and import products, variants, RAL/dimensions, barcodes, vendor data and opening prices	Data Lead	Standard	Product reconciliation
103	Import opening stock by warehouse/location/variant and reconcile quantities and valuation	Inventory Accountant	Standard	Signed stock reconciliation
104	Import open sales orders, purchase orders and in-transit shipments as agreed	Data Lead	Standard	Open-document reconciliation
105	Import open AR/AP items, advances, driver balances, petty cash, bank and GL opening balances	Chief Accountant	Standard	Opening trial balance signoff
106	Perform at least two full migration rehearsals and record timing, errors and corrections	Data Lead	Standard	Rehearsal reports
107	Freeze legacy data, execute final extraction/import and archive signed source files	Project Manager	Standard	Cutover data pack
108	Run post-load reconciliation: record counts, stock, subledgers, journals and trial balance	Chief Accountant	Standard	Go-live reconciliation certificate

P10 - Technical development and release assurance

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
109	Write functional specifications and acceptance criteria for every extension before coding	Functional Lead	Custom governance	Approved specifications
110	Create isolated custom addons with manifests, access controls, translations and upgrade-safe inheritance	Development Lead	Custom	Installable modules

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
111	Add automated unit/transaction tests for discount, credit, quality, driver cash and transfer controls	Development Lead	Custom	Automated test evidence
112	Review performance and query behavior of cross-branch availability and customer history panels	Technical Lead	Custom	Performance benchmark
113	Test Arabic/English labels, RTL rendering, IQD/USD formats and printable documents	QA Lead	Standard + custom	Localization QA report
114	Perform code review, security review, dependency check and staging installation/upgrade test	Technical Lead	Custom	Release approval
115	Document configuration, custom modules, parameters, support diagnostics and rollback steps	Technical Lead	Custom	Technical runbook

P11 - Training, UAT, go-live and closure

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
116	Prepare role-based Arabic/English training guides and realistic door-trading exercises	Training Lead	Standard	Training materials
117	Train owners on dashboards, approvals, drill-down and exception monitoring	Training Lead	Standard	Owner attendance and assessment
118	Train seven accounting roles separately, including prohibited actions and handoffs	Training Lead	Standard	Accounting competency signoff
119	Train warehouse specialists on barcode, transfers, quality, dispatch, counts and discrepancies	Training Lead	Standard	Warehouse competency signoff
120	Train sales/POS users on attribute search, stock visibility, pricing, customer history and approvals	Training Lead	Standard	Sales competency signoff
121	Run conference-room pilot across complete order-to-cash, procure-to-pay and record-to-report cycles	QA Lead	Standard	Pilot issue log
122	Run formal UAT with client users, evidence, severity, retest and signed acceptance	Project Manager	Standard	UAT signoff
123	Complete go-live readiness review covering data, devices, users, controls, reports and support	Steering Committee	Standard	Go/no-go decision
124	Execute production cutover and validate first transactions at all three locations	Project Team	Standard	Day-one validation
125	Provide daily hypercare in week one, then agreed review cadence with severity-based SLA	Support Lead	Standard	Hypercare log
126	Reconcile first POS closures, driver handovers, stock transfers, bank/card receipts and accounting close	Chief Accountant	Standard	Post-go-live control signoff
127	Deliver administrator handover, as-built configuration, source code, test evidence and support runbook	Project Manager	Standard	Handover pack
128	Close critical issues, approve deferred backlog and obtain	Sponsor	Standard	Closure certificate

ID	Task	Responsible	Treatment	Deliverable / acceptance evidence
----	------	-------------	-----------	-----------------------------------

final project acceptance

6. Minimum end-to-end UAT scenario pack

- Retail POS cash sale with door, frame, accessory and trimming; correct tier price; passed quality; receipt and postings.
- Wholesale order for 15 doors across branches; 10% tier, reservation, transfer, delivery and invoice.
- Excess discount and credit breach; freeze, AR then Owner approval, rejection path.
- USD container purchase, partial receipt, landed costs, three-way match and FX payment.
- Manifest-driven Main-to-Branch transfer with transit and discrepancy.
- Failed quality moves to quarantine and blocks delivery/POS until passed recheck.
- COD delivery to driver box, counted handover, central vault transfer and variance.
- Customer 360 shows variant history, invoices, debt and credit limit.
- Bank/card import and reconciliation model proposes account, branch and analytics.
- Mock close reconciles stock, POS, driver cash, AR/AP, bank, tax, trial balance and branch P&L.

7. Training and client inputs

Training is separate for owners, each of the seven finance roles, the three inventory specialists, sales/POS users, and administrators. Completion requires attendance plus practical competency exercises, not attendance alone.

Required inputs include legal/tax data; approved chart of accounts; users and approval limits; product/variant/RAL/dimension/barcode data; opening stock and finance balances; quality rules; pricing and credit policies; POS/scanner hardware; card and bank formats; and signed tax treatment.

8. Assumptions, risks and final acceptance

- One Iraqi legal company and three warehouses/branches. Multi-company changes scope.
- Odoo 19 Enterprise and Odoo.sh are available; licenses, hardware and third-party integrations are commercial items unless included.
- No MRP, field installation, GPS, route optimization or eCommerce.
- Reference custom addons are not copied without separate specification, security review and approval.
- At least two migration rehearsals and a mock month-end close are mandatory.
- Final acceptance requires all 128 tasks completed/deferred by change control, no open critical issues, reconciled openings, signed security/control tests, training, UAT, handover and closure.
